SUMMARY

Computer Science student at Cairo University, specializing in Decision Support Systems and passionate about web development.

PROJECTS

1- Football Players Data Project

Role: Student Developer

Tools: Data Structures (C++ / Java)

- Built a system for collecting and organizing football players' data.
- Applied data structures concepts to efficiently store and manage data.
- Improved data processing and retrieval performance.

2- Movies Website

Role: Student Developer

Tools: HTML, CSS, JavaScript

- Developed a website for browsing and exploring movies.
- Designed a user-friendly interface for better user experience.
- Implemented dynamic features for displaying movie content.

3- Supermarket Database System

Role: Student Developer

Tools: C#, SQL

- Developed a database system for managing supermarket operations and products.
- Designed and implemented data storage, retrieval, and management functionalities.
- Applied SQL concepts for efficient data handling and querying.

EDUCATION

Bachelor's Degree in Computers and Artificial Intelligence

Cairo University, Egypt

Expected Graduation: 2027

SKILLS

- Self-motivated
- Attention to Detail
- Problem Solving
- Willingness to Learn
- Teamwork

Language Skills

- Arabic: Native
- English: Very Good
